[Exchange Server 2010 Service Pack 2 Contains New Features Geared Toward The Cloud And Office 365](#)

New Hybrid Configuration

New Hybrid Configuration

Completion

New Hybrid Configuration

Create a new hybrid configuration for sharing calendars, sharing contacts, accessing free/busy information, and moving mailboxes between on-premises and Office 365 organizations.

A hybrid configuration requires a federation trust with the Microsoft Federation Gateway and a certificate. A federation trust and self-signed certificate will be generated automatically.

The default name of the hybrid configuration is "Hybrid Configuration".
